Hi everyone

Here are some sheets to practise with. You can write on the sheets if you want to. You could also open a Word document and type on that or use rough paper at home. The answers are there too. I think these are being all sent out together as a class so YR3s who finish too fast can do the YR4 work. YR4s who want to remember how to do it again have a quick look at the YR3 work.

To practise sharing things out equally have a pile of Smarties, pennies, biscuits or anything. If you have 8 Smarites put them into 4 equal piles. There must be the same amount in each pile of the 4 piles. How many is there in each pile?

Watch the videos to remind you.

This first video talks about things like we do in class:
https://m.youtube.com/watch?v=FApcjdAhnrY

This second video talks about things slightly differently. Some of you can watch it to think about things slightly differently:
https://m.youtube.com/watch?v=KGMf314LUc0

Remember REAL WORLD MATHS means there are going to be some remainders sometimes.

Stay well and we will all be back to school soon.

Mrs Buss is home too and my children. We are staying well and fit. I am talking to Miss T, Miss Wadsworth and Ms Rodgers regularly and we want to do the best for you.

I am playing guitar, exercising and enjoying the sun. This strange time will pass and we will all be back to school sometime. Teach people you live with how to play *Guess My Number* and remember your U T H Th places. Remember the good questions to ask and see how many questions you can get down to.

Best Wishes

Mr Buss
